

### **Year 6 summer transition task options**

We hope you enjoyed your transition days here at The Holgate Academy. Over the summer have a go at one, some or all the below tasks to help you get ready for geography in year 7.

#### **Task 1: Where in the World**

Can you colour and label the name of any country that you have been to or have got connections to. For example, you might have been to Lanzarote on holiday or have an aunt who lives in Brazil!

Task 2: Can you locate where we are in the UK on the map attached. Colour it in and add lines from the UK to each of the countries you are connected to.

#### **Task 3: My Map**

What are the places in the local area that are important to you? Friends or relatives' houses or places you play. Can you draw a map from your house to there. Try to use a bird's eye view if you can and add in anything else you can remember on the way.

#### **Task 4: My Island**

In Geography we study natural landscapes and people and the cities they live in.

We look at natural features such as rivers, mountains and glaciers.

We also look at the man-made things around us like towns and cities.

Can you design your own island. It should have a mixture of man-made and natural features.

You could also decide where in the world your island will be located.

It could be a cold island near the Poles or a tropical island near the Equator.

Add a description of where your island is and what other countries it is near. Maybe include some animals and how they survive on your island.

#### Task 5: Design a Flag

Finally, for your island you will need to design a flag that represents
